

# CONTROL OVER YOUR TOOLS

anytime & anywhere

The complete solution for an automated supply chain and stock with the SecoPoint Tool Management System by

**fasttools**<sup>TM</sup>  
FIRST CHOICE FOR ENGINEERS

# about

**Unique worldwide system**

**Save 5 to 10 percent immediately on installation**

**Always up-to-date**

**What if one single solution could make the difference between average and fantastic results, waste and control or even loss and profit?**

In order to be truly competitive in the modern marketplace, you need to take control of production and stock.

As a Premier Distributor for

Fast Tools can help you get this competitive edge using the SecoPoint Tool Management System by Seco Tools.

SecoPoint provides all the means you need to optimize your stock, reduce your costs and a whole lot more. SecoPoint makes sure that your production is never halted due to tool loss or low stock levels. This is the market leader for point of use systems.

With SecoPoint, you configure the information you need, once. After that, just sit back and watch the system save you time and money.

The reports will prove that the system truly does what it claims. The typical installation usually cuts your tool consumption costs by between five to ten percent, immediately upon installation.

#### Internet Based

SecoPoint is internet-based. This means that you can have an overview of your data wherever you are.

#### Intelligent linking with SupplyPort

The SecoPoint operating system synchronises tool consumption and stock holding perfectly. SupplyPort can easily be linked up with your company software, such as SAP, Oracle, Movex and many more.

#### Always up-to-date

Tool transactions are automatically synchronised with the stock control software and stocks are continually updated. Follow up re-stocking orders are generated automatically in line with your requirements. Statistics for purchasing and controlling are available at any time.

#### Easy access with SupplyLink™

Tool dispensing and return control is self-explanatory and user-friendly, via a touch screen. Machine, workpiece, cost centre, components or the order are identified securely and quickly and allocated to the dispensed tool.

Fast Tools will manage the supply, installation and maintenance of the SecoPoint System. Unlike other systems this intelligent vending machine can be tailored to offer a combination of products from different manufacturers and not just one.

# details

**Intelligent linking  
with you existing  
company software**

**Reduce consumption**

**Automated  
re-ordering**

## Order
